

Repeat Ordering Process at IMC

If a pharmacy is going to collect on patients behalf, the patient will need to sign a consent form which will need to be scanned in patients notes. **ONLY THEN** can a pharmacy request and collect medication for patients.

Acute Prescribing

Any medications which are acute or in the past **CAN NOT** be ordered by the pharmacy. Patients will need to order themselves over the phone or at the desk. All information will be put onto a query sheet (patients demographic; medication name; reason for request; last issued date) and shown to the GP at the end of the working day. If approved, these prescriptions will be ready to collect after 48hours from the date of request (two working days).
